Wi-Fi Configuration for Windows 10

Before proceeding, check whether your device's wireless switch is ON.

1. Click on the Wireless icon  in the notification bar at your desktop.
2. A window showing available wireless network connections will appear. Click on the drop down arrow to see the list of all available connections.
3. Select **myWiFi** and tick the **Connect automatically** check box. Click **Connect**. (See Visual 1)
4. In the **Enter the network security key** field, type **accessingwifi** and click **Next**. (See Visual 2)
5. After you connect the network, you'll see **Connected, secured** below to the myWiFi. (See Visual 3)

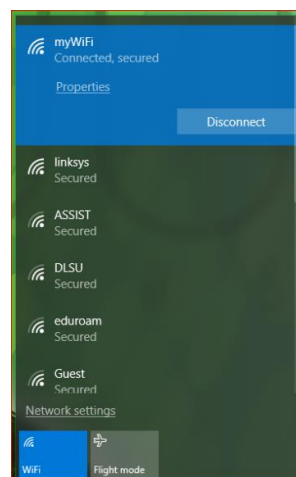

You can now start accessing the internet.
